

New supplier for cytokines and growth factors

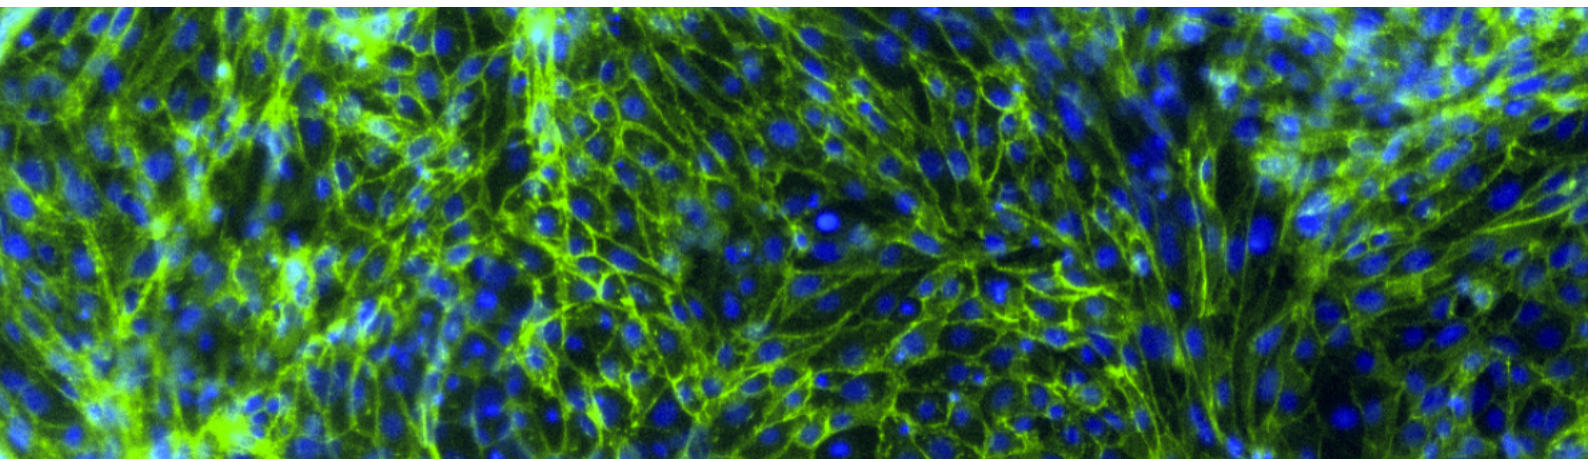

BioNordika is happy to announce that Qkine now offer the highest purity, most reliable growth factors, cytokines and other novel proteins developed and manufactured by our supplier Qkine.

Qkine re-defines industry standards for growth factor and cytokine biochemical quality to enable you to more reproducibly and cost-effectively scale your stem cell, organoid and regenerative medicine applications. Their proteins are manufactured in a animal-derived component free (ADCF) laboratory with very strict and robust quality criteria and rigorous purity and bioactivity testing conducted on every batch.
